Subject: hydroxyprogest.

Barry,

I have a question or two about a lot of hydroxy. I made (on 12/29) a lot of **500ml** with the new filter system (90mm). The guys in here and I though that we should keep this lot quarintined until we get some test results back. This is the first lot I have made using the new filter, and we really have never validated the process. Alla mentioned to me that there are two orders for **30 1ml** vials. I believe that one is supposed to go out today and then another either friday or monday. I also made a lot of **250ml** (on 12/30) but that has covered yesterdays orders, with very few vials left for stock.

I am just unsre how you wanted to handle this. There are two orders (currently) on the message board to go out today. 1-10ml vial and the 30-1ml vials. Please give me a call, or I will try to get a hold of you.

Thanks,
CbF
